There is more than paint and wallpaper as decorative finishes for your walls. Wainscot and paneling creates a three dimensional effect and provides some relief to bare white walls. Wainscot can brighten a room, deepen its ambiance and give a touch of nature to the space.

The options are limitless with wainscot. From applying floor to ceiling to covering only a portion of your wall, you can create different looks and feels. It is also a great product to use on ceilings, whether it be in your basement or adding dimension to any room of the house.

Our wainscot program offers multiple species, grades and sizing to suit everyone's needs.
